DATE MAILED: 06/24/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

DETAILED ACTION

1. It is noted continued examination under 37 CFR 1.114 does not apply to an application unless prosecution in the application is closed. The instant application was under a non-final office action, therefore, prosecution was not closed. Since the RCE was accompanied by a reply to a non-final Office action, the reply will be entered and considered under 37 CFR 1.111.
2. However, the amendment filed on April 6, 2004 canceling all claims drawn to the elected invention and presenting only claims drawn to a non-elected invention is non-responsive (MPEP § 821.03). The remaining claims are not readable on the elected invention. Applicant elected claims drawn to nucleic acids for examination on the merits, see Office Action mailed October 7, 2003. Claims drawn to methods for identifying effects of a compound in a mammal by assaying the effect of compounds on polypeptides. The nucleic acids originally presented are patentably distinct from the newly presented method. The nucleic acids are not relied upon in the instant method. Rather the claims are directed to using polypeptides.

Since the above-mentioned amendment appears to be a *bona fide* attempt to reply, applicant is given a TIME PERIOD of ONE (1) MONTH or THIRTY (30) DAYS, whichever is longer, from the mailing date of this notice within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD UNDER 37 CFR 1.136(a) ARE AVAILABLE.
